1

HONDA® GROUP (HONDA® USA- ACURA®) FUNCTIONS MENU

The functions on these vehicles are:

- Add new keys (max. 6, with 1 key programmed);
- Reading of the number of keys/cards memorized;
- Delete all keys present (and code new keys);
- Immobilizer replacement (for Prelude model only).

To make use of this function, use:

	 <p>SWITCH ADAPTER</p>
 <p>CABLE OBD II [00] (STANDARD)</p>	 <p>NOT REQUIRED</p>
<p>> ADD There must be 1 operational key available</p>	<p>> ERASE ALL KEYS If no keys are operational, delete those in the memory and programme at least 2 of them.</p>
<p>> IMMOBILIZER REPLACEMENT (For Prelude only, when all the keys are mislaid)</p> <p>ORIGINAL KIT: A) red Master key B) black key C) central unit</p> <p>N.B. Besides A and B operational, programme at least 1 new key</p>	<p>- Keys to be programmed (Max.6)</p>

SBB	CABLE/ADAPTER
	 <p>CABLE OBD II [00] (STANDARD)</p>

WHERE TO FIND THE PLUG DIAGNOSTICS

SELECTING THE CAR MAKE

In this case SDD/SBB is able to automatically recognize the various central units connected and therefore uses the right communication procedure.

Simply identify:

- CAR MODEL;
- YEAR OF MANUFACTURE.

- Use the $\uparrow\downarrow$ arrow keys to select the make, then press **ENTER**;
- Press **ESC** to quit.

FUNCTIONS MENU

This section allows the functions to be carried out, in particular to:

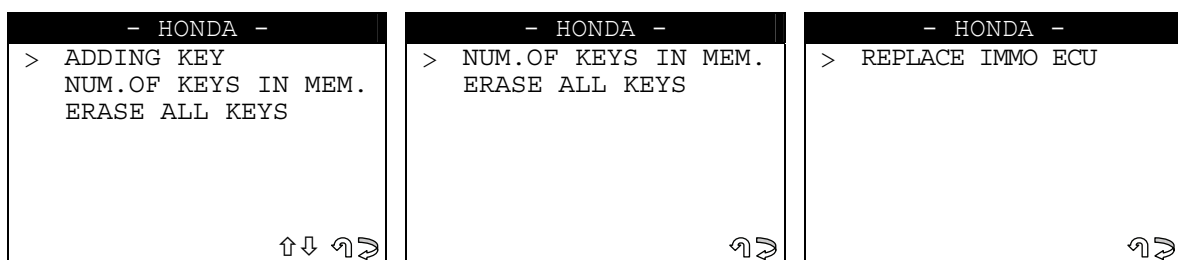

- Programme new keys in the immobilizer also when all the original keys are missing;
- Delete the code for a missing key from the immobilizer memory;
- Check how many keys are stored in the immobilizer memory;
- Adapt the new ECU immobilizer (only for Prelude Model).

ATTENTION: the programming system for HONDA® GROUP (without a red key) is structured so that single keys can be added to the immobilizer system as long as there is at least one working key available. If all the working keys are missing the “ERASE ALL KEYS” function must be used, with which to delete all the keys in the memory and code new keys.

The structure of the HONDA® functions menu is as follows:

- There is already a key in the **ON** position on the ignition unit.

Depending on the vehicle model selected, the following is displayed:

- Select and press **ENTER**.

1.1

ADDING KEY

This function is used to add a new key to the immobilizer.

To programme a new key there must be at least one working key available.

- To enable the function select “**ADD A KEY**” and press **ENTER**.

The display will show:

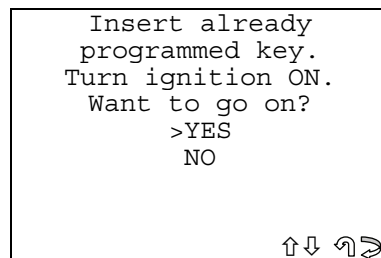

- Press **ESC** to quit;
- Press **ENTER** to confirm.

The display will show:

- Turn the key to the **OFF** position and press a key (within 20 sec.).

- Fit a programmed working key into the ignition block (customer's key), and turn to the **ON** position;
- Select YES/NO and press **ENTER**;
- **No**, to return to the screen showing IMMOBILIZER functions menu;
- **Yes**, to memorize the data for the operation just completed;
- Press **ESC** to quit.

The display will show:

- Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

Insert the new
key, turn
ignition ON

Press any key...

Fit the new key to be programmed into the ignition block and turn to the **ON position** (within 20 sec.).

The display will show:

Turn ignition OFF!

Press any key...

- Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

Turn ignition ON!

Press any key...

- Turn the key to the **ON position** and press a key (within 20 sec.).

The display will show:

Turn ignition OFF!

Press any key...

- Turn the key to the **OFF position** and press a key (within 20 sec.).

Insert already
programmed key.
Turn ignition ON.

Press any key...

- Fit the programmed working key (customer's key) into the ignition block and turn to the **ON position** (within 20 sec.).

- Press a key to continue.

The display will show:

```
Turn ignition OFF!  
  
Press any key...
```

- Turn the key to the **OFF position** and press a key (within 20 sec).

The display will show:

```
Turn ignition ON!  
  
Press any key...
```

- Turn the key to the **ON position** and press a key (within 20 sec).
- If an error has occurred during programming, appears: **error message No. 5** (see ch. "WARNING/ERROR MESSAGES" of the Operating manual).
- If the key programming stage is successful the following message will appear:

```
The key have been  
stored  
  
Press any key...
```

- Press a key to continue.

KEY TESTING

ATTENTION: To check operation of the keys, try starting the car with the memorized keys (wait 30-40 sec. between one ignition and another). If this does not work, repeat the memorizing operation.

OPERATIONS ARCHIVES - USERS DATA

When the programming operation has been completed, the following appears:

```
Do you want to save  
the customer data?  
  
NO  
>YES  
  
↑↓ ↻➔
```

- Select YES/NO and press **ENTER**;
- **No**, return to the **IMMOBILIZER functions menu** screen;
- **Yes**, save the data for the operation that has just been completed;
- Press **ESC** to exit.

SAVING USER DATA

To enter user data, the following is displayed:

```
- USER DATA -
POS.: 001
DATE: 19/07/01
> SURNAME:XXXXXXXXXX
NAME:  XXXXXXXXXXXXX
REG.NO: XXXXXXXXXXXXX

↑↓↔⇒↵
```

- SURNAME (mandatory) (**12 characters**).
- NAME / REG. NO. (optional) (**12 characters**).

The following data will be saved automatically:

- **POS.:** Location where the data will be saved;
- **DATE:** Operation date;
- **MAKE:** Make of the vehicle for which the operation was performed;
- **MODEL:** Model of the vehicle for which the operation was performed;
- **YEAR:** Model year;
- **Keys stored:** Number of keys stored in memory;
- **PIN CODE:** (if storage is confirmed by an operator);
- **IMMO ID:** Immobilizer control unit ID.

To enter data:

- Use the ↑↓ keys to position on the desired item;
- Press ⇒ to enter and select the field where the text is to be typed;
- To confirm, press **ENTER**;
- To exit and save the data, press **ESC**.

```
Is information
inserted correctly?
NO
>YES

↑↓↔⇒↵
```

- Select YES/NO and press **ENTER**;
- **No**, return to the data entry screen;
- **Yes**, save the entered data;
- Select **ESC** to exit.

1.2 NUMBER OF KEYS IN MEMORY

This function is used to view the number of keys stored in the immobilizer memory. After selection the display will show:

```
- NUM.OF KEYS IN MEM.-
Number of keys in
memory:
XX

Press any key...
```

- Press any key to continue.

1.3

ERASE ALL KEYS

This function is used to erase all keys memorized in the immobilizer and reprogramming new keys in the immobilizer.

To activate the function, select "**ERASE ALL KEYS**" and press **ENTER**.

After selection the display will show:

- Select YES/NO and press **ENTER**;
- **No**, to return to the screen showing IMMOBILIZER functions menu;
- **Yes**, to delete the key;
- Select **ESC** to quit.

The display will show:

- Enter the number of keys to be stored in the memory;
- Press **ENTER** to confirm;
- Select **ESC** to quit.

The display will show:

- Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

- Turn the key to the **ON position** and press a key (within 20 sec.).

The display will show:

Turn ignition OFF!

Press any key...

- Turn the key to the **OFF position** and press a key (within 20 sec.);
- According to the number of keys to be reprogrammed, the display will show:

1 key

Turn ignition ON!

Press any key...

- Turn the key to the **ON position** and press a key (within 20 sec.).

3-4-5-6 keys

Insert the second key
to program.
Turn ignition ON!

Press any key...

- Insert the 2nd key to be programmed into the ignition, turn to the **ON position**, press any key (within 20 sec.);
- Repeat for all the other keys.

The display will show:

Turn ignition OFF!

Press any key...

- Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

Turn ignition ON!

Press any key...

- Turn the key to the **ON position** and press a key (within 20 sec.).

The display will show:

Turn ignition OFF!

Press any key...

- Turn the key to the **OFF position** and press a key (within 20 sec.).
The display will show:

```

Turn ignition ON!

Press any key...

```

- Turn the key to the **ON position** and press a key (within 20 sec.).
The display will show:

```

If the warning light
on the console is
blinking repeat the
procedure because an
error with the keys
has occurred.

Press any key...

```

KEY TESTING

ATTENTION: Check operation of the keys, try starting the car with the memorized keys (wait 30-40 sec. Between one ignition and another). If this does not work, repeat the memorizing operation.

- Press any key to continue.

OPERATIONS ARCHIVES - USERS DATA

When the programming operation has been completed, the following appears:

```

Do you want to save
the customer data?

NO
>YES

↑↓ ↻

```

- Select YES/NO and press **ENTER**;
- **No**, return to the **IMMOBILIZER functions menu** screen;
- **Yes**, save the data for the operation that has just been completed;
- Press **ESC** to exit.

SAVING USER DATA

To enter user data, the following is displayed:

```

- USER DATA -
POS.: 001
DATE: 19/07/01
> SURNAME:XXXXXXXXXX
NAME: XXXXXXXXXXXXX
REG.NO: XXXXXXXXXXXXX

↑↓↔ ↻

```

- SURNAME (mandatory) (**12 characters**);
- NAME / REG. NO. (optional) (**12 characters**).

The following data will be saved automatically:

- **POS.:** Location where the data will be saved;
- **DATE:** Operation date;
- **MAKE:** Make of the vehicle for which the operation was performed;
- **MODEL:** Model of the vehicle for which the operation was performed;
- **YEAR:** Model year;
- **Keys stored:** Number of keys stored in memory;
- **PIN CODE:** (if storage is confirmed by an operator);
- **IMMO ID:** Immobilizer control unit ID.

To enter data:

- Use the $\uparrow\downarrow$ keys to position on the desired item;
- Press \Rightarrow to enter and select the field where the text is to be typed;
- To confirm, press **ENTER**;
- To exit and save the data, press **ESC**.

- Select YES/NO and press **ENTER**;
- **No**, return to the data entry screen;
- **Yes**, save the entered data;
- Select **ESC** to exit.

1.4

REPLACE IMMO ECU

For these models (if the Red Master key or all the black keys are missing) the immobilizer unit must be replaced with a new one, which must then be programmed on the vehicle, using the "**REPLACE IMMO ECU**" function.

The new unit immobilizer is composed of:

- **1 RED MASTER key (A);**
- **1 BLACK key (B);**
- **1 new CENTRAL IMMOBILIZER UNIT (C).**

Both keys (A and B) have already been programmed in the new central immobilizer unit.

Replace the old central Immobilizer unit on the vehicle with the new one (C).
Select "**REPLACE IMMOBILIZER**" and press **ENTER**.

The display will show:

- Select and press **ENTER**.

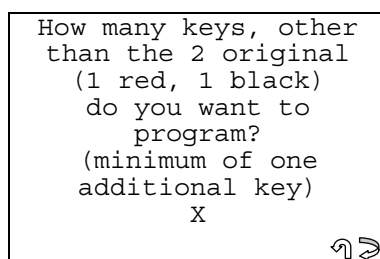

When the old central immobilizer unit has been replaced, the new one must be programmed on the vehicle, using the procedure described below.

Do not carry out this operation on an OLD central unit.

- Select **ESC** to quit;
- Select **ENTER** to continue.

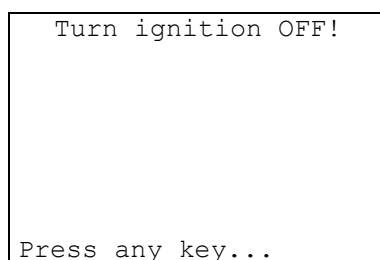

The display will show:

- Select **ESC** to quit.

Enter the number of keys to be programmed (in addition to the two keys (A) and (B) provided with the new immobilizer unit (C)).

At least one other key besides (A and B) must be programmed.

Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

Fit the Red key (A) (provided with the new immobilizer unit) into the ignition block and turn the key to the **ON position** (within 20 sec.).

- Press any key to continue.

The display will show:

Turn ignition OFF!

Press any key...

Turn the key to the **OFF position** and press a key (within 20 sec.).
The display will show:

Turn ignition ON
with original
black key

Press any key...

Fit the Black key (B) (provided with the new immobilizer unit) into the ignition block and turn the key to the **ON position** (within 20 sec.).

- Press any key to continue;
- The display will show:

Turn ignition OFF!

Press any key...

Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show a message giving the number of keys to be reprogrammed (in addition to the two provided) with the new immobilizer unit:

1-2-3-4-5-6 keys

Insert the X
key to program.

Turn ignition ON!

Press any key...

- Insert the key into the ignition block, turn the key to the **ON position** and press a key (within 20 sec.);
- The display will show:

Turn ignition OFF!

Press any key...

- Turn the key to the **OFF position** and press a key (within 20 sec.);
- Repeat for all the other keys.

The display will show:

Turn ignition ON
with new red key

Press any key...

Fit the Red key (A) (provided with the new immobilizer unit) into the ignition block and turn the key to the **ON position** (within 20 sec.).

- Press any key to continue.

The display will show:

Turn ignition OFF!

Press any key...

Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

Turn ignition ON
with original
black key

Press any key...

Fit the Black key (B) (provided with the new immobilizer unit) into the ignition block and turn the key to the **ON position** (within 20 sec.).

- Press any key to continue.

The display will show:

Turn ignition OFF!

Press any key...

Turn the key to the **OFF position** and press a key (within 20 sec.).

The display will show:

Turn ignition ON!

Press any key...

Turn the key to the **ON position** and press a key (within 20 sec.).
The display will show:

```
Turn ignition OFF!  
  
Press any key...
```

Turn the key to the **OFF position** and press a key (within 20 sec.).
The display will show:

```
Turn ignition ON!  
  
Press any key...
```

Turn the key to the **ON position** and press a key (within 20 sec.).
The display will show:

```
If the warning light  
on the console is  
blinking repeat the  
procedure because an  
error with the keys  
has occurred  
  
Press any key...
```

KEY TESTING

ATTENTION: check operation of the keys, try starting the car with the memorized keys (wait 30-40 sec. between one ignition and another). If this does not work, repeat the memorizing operation.

- Press any key to continue.

OPERATION ARCHIVES - USER DATA

At the end of the programming operation the display will show:

```
Do you want to save  
the customer data?  
NO  
>YES  
  
↑↓ ↻
```

- Select YES/NO and press **ENTER**;
- **No**, to return to the screen showing IMMOBILIZER functions menu;
- **Yes**, to memorize the data for the operation just completed;
- **ESC** to quit.

SAVING USER DATA

To enter user data, the following is displayed:

```
- USER DATA -
POS.: 001
DATE: 19/07/01
SURNAME: XXXXXXXXXXXX
> NAME: XXXXXXXXXXXX
REG.NO: XXXXXXXXXXXX

↑↓↔⇒
```

- SURNAME (mandatory) (**12 characters**).
- NAME / REG. NO. (optional) (**12 characters**).

The following data will be saved automatically:

- **POS.:** Location where the data will be saved;
- **DATE:** Operation date;
- **MAKE:** Make of the vehicle for which the operation was performed;
- **MODEL:** Model of the vehicle for which the operation was performed;
- **YEAR:** Model year;
- **Keys stored:** Number of keys stored in memory;
- **PIN CODE:** (if storage is confirmed by an operator);
- **IMMO ID:** Immobilizer control unit ID.

To enter data:

- Use the ↑↓ keys to position on the desired item;
- Press ⇒ to enter and select the field where the text is to be typed;
- To confirm, press **ENTER**;
- To exit and save the data, press **ESC**.

```
Is information
inserted correctly?

NO
>YES

↑↓⇒
```

- Select YES/NO and press **ENTER**;
- **No**, return to the data entry screen;
- **Yes**, save the entered data;
- Select **ESC** to exit.
